

A \$307 Billion Market Opportunity with an Unmet Flavor Gap

The U.S. dairy and gourmet/specialty food markets represent a combined \$307 billion opportunity, yet no major player offers a flavored whipped topping - leaving a clear opening for a differentiated product.

Market size (\$B)

- The plan frames Whipped Dream in dairy products and gourmet/specialty foods.
- The dairy market is large and still expected to grow modestly.
- The gourmet/specialty segment supports premium positioning.

Market context	Source figure
Dairy + specialty opportunity	\$268B + \$39B

Whipped Dream: Gourmet Flavored Whipped Cream in Multiple Formats

Four signature flavors, validated over 18 years of restaurant service, now packaged for retail in frozen tubs and pressurized cans with a gourmet-focused label.

Attribute	Source detail	Investor relevance
Flavors	Chocolate, raspberry, cinnamon almond, strawberry	More variety than standard toppings
Frozen tubs	8 oz and 12 oz plastic tubs	Retail freezer format
Pressurized can	6 oz cans	Convenience format
Shelf life	21 days refrigerated; up to 6 months frozen	Manageable inventory window
Price point	\$2.29/unit planned	Premium vs. national brands

- Differentiation is flavor-led, not technology-led.
- Formats match both frozen tub and pressurized-can consumption patterns.
- Product claims are limited to the categories and shelf-life stated in the PDF.

18 Years of Customer Validation Across Two Established Restaurants

The Beans have already proven product-market fit - flavored toppings have been served and praised in their restaurants for 18 years, with three grocery retailers ready to carry the product on day one.

Milestone	Source fact	Signal
1981	First restaurant opened in Antlers, Oklahoma	Operator experience
1988	Second restaurant opened in Hugo, Oklahoma	Repeatability
Dessert reputation	Restaurants had special notoriety for desserts	Relevant demand signal
18 years	Large-quantity production and restaurant use	Long operational trial

- This is not a concept-only launch; the source describes repeated restaurant use.
- The initial retail plan builds from owner-operated demand and local grocery interest.
- Validation evidence remains local and operational, so expansion still needs channel proof.

Phased Market Expansion: Local -> Oklahoma City -> Tulsa

A three-phase rollout leverages existing brand strength in southeastern Oklahoma before entering two major metropolitan markets, with sales estimates based on achievable market share.

Market	1999	2000	2001
Antlers	24,000	26,400	29,040
Hugo	36,000	39,600	43,560
Oklahoma City	45,000	120,000	132,000
Tulsa	0	0	54,000

- Local stores anchor the launch.
- Oklahoma City carries the largest early expansion volume.
- Tulsa is introduced later in the projection.

Dual Distribution Strategy: Frozen Tubs Plus Pressurized Cans

Two complementary retail formats match existing consumer purchasing patterns - 65% of national brand whipped topping is sold in frozen tub form and 35% in pressurized cans.

Market format split

- Frozen tubs are the larger category in the source.
- Pressurized cans broaden convenience and retail reach.

Distribution path	Source evidence	Role
Local grocery	Pruett's IGA and Gardiner's Grocery named	Launch channel
Made in Oklahoma program	Pratt's Foods in Oklahoma City	Metro exposure
Retail formats	8/12 oz tubs and 6 oz cans	Two buying occasions

Price	Unit	Source
Whipped Dream	\$2.29	Plan
National brands	\$1.29-\$1.89	Market scan
Category mix	65% / 35%	Tub / can

Competitive Advantage: Only Flavored, Dairy-Based Whipped Topping in Market

Large incumbents dominate distribution but offer zero flavor variety - several competing products are not even dairy-based - creating a clear differentiation gap for Whipped Dream.

Attribute	Whipped Dream	Kraft	Sara Lee	Investor read
Flavor variety	Chocolate, raspberry, cinnamon almond, strawberry	Standard varieties	Standard varieties	Flavor whitespace
Flavored topping	Yes	Not marketed in source	Not marketed in source	Differentiation
Dairy-based	Dairy whipped topping	Some products not dairy-based	Some products not dairy-based	Ingredient positioning
Formats	Tubs + pressurized cans	Ready-to-eat varieties	Ready-to-eat varieties	Channel flexibility

\$1.29-\$1.89

National brand range

4

Flavor variants

- The source supports a premium/variety thesis, not a proven national moat.

Manufacturing Ready: Existing Equipment Plus Co-Pack Partnership

Production is already running at commercial scale in the Beans' own facilities, with a contracted co-packer for pressurized cans - minimal capital required to begin retail distribution.

Capability	Source detail	Implication
Facilities	Two restaurants can be used when closed to public	Low initial setup burden
Mixer	50-gallon high-speed mixer	Batch production
Gas system	Pressurized tank for nitrous oxide	Whipped texture
Freezer	10x10 walk-in freezer	Frozen storage
Co-pack	Farm Fresh contracted for 6 oz cans	Can format partner

- The source says the process is established on a commercial scale.
- County inspection allows production in restaurant facilities when they are not open to the public.
- Farm Fresh has a nondisclosure and non-compete agreement in place for the can work.

Financial Projections: Positive Cash Flow Year One, 10.88% ROE, 3-Year Growth Path

Year 1 delivers positive cash flow and profit with a 10.88% return on equity; net sales grow from \$240,450 to \$592,194 over three years with expanding market entry.

Metric	1999	2000	2001
Net sales	\$240,450	\$425,940	\$592,194
Gross income	\$58,450	\$107,880	\$149,988
NI after tax	\$15,085	\$35,686	\$46,821.60
Cash flow	\$21,550	not shown	not shown

1999 ratio	Source value
ROE	10.88%
Current ratio	2.73
Quick ratio	1.26
Debt-to-equity	0.38

Risk Mitigation: Defined Contingency Triggers at 90% of Projections

A structured contingency plan activates if sales or returns fall below 90% of projections, with escalating responses from doubled promotions to contracted local marketing specialists.

Trigger / risk	Source contingency	Operating logic
Sales below 90% of expected	Double in-store promotions	Immediate demand response
No increase within one month	Advertise in weekly circulars	Local awareness push
OKC/Tulsa underperform after 6 months	Use local marketing specialists on commission	Variable-cost channel support
Cash pressure	Review AR, payment periods, and cash-flow projections	Working capital control
Unit economics pressure	Review production and marketing costs vs. prices	Margin defense

- The plan accepts a 10% negative deviation from expected sales and projected returns.
- Risks are not removed, but there is a staged operating response before larger commitments.

Investment & Partnership Ask

Fancy's Foods seeks early investors and channel partners to support phased market expansion of the only flavored, dairy-based whipped topping - backed by proven product, ready manufacturing, and banker-ready financial projections.

Need	Source-backed rationale	Partner/investor role
Retail access	Local groceries and Made in Oklahoma path identified	Open channel doors
Manufacturing scale	In-house equipment plus Farm Fresh can partner	Support controlled capacity ramp
Metro expansion	OKC and Tulsa included in projections	Help validate larger markets
No stated capital amount	PDF provides projections but no ask amount	Define amount after diligence

- Near-term diligence: verify retailer commitments, co-pack economics, and production capacity.
- Partnership fit: grocery distribution, specialty food channels, and dairy/co-pack operations.
- Decision principle: fund and partner only against the source-backed phased rollout.
